Creating a Respectful Student Community

Taking Responsibility for Your Living and Learning Environment

The Canadore 2012 Strategic Vision states that we focus on both student life and classroom experience. This means that every experience that you encounter along your educational path is an opportunity for learning through personal and professional growth.

It is anticipated that your interactions within the student and college community are positive ones. However, when things don't go as you anticipated the College has an obligation to investigate and to take action.

Academic Integrity Canadore College is committed to ensuring fair and equitable treatment of all members of its community while maintaining the academic integrity of programs and curriculum, and an academic climate conducive to learning and free from disruptive or inappropriate behaviour.

Discrimination and Harassment Canadore College is committed to providing a superior working environment for our faculty and staff, and through them, an exceptional living and learning environment for our students and clients. Interaction between members of the College is based on mutual respect, trust, cooperation and understanding inherent in an adult learning community.

Code of Conduct It is expected that all persons will respect the personal and property rights of individuals and of the college, and that all persons will conduct themselves in accordance with the laws of the land and all commonly accepted conventions of behaviour.

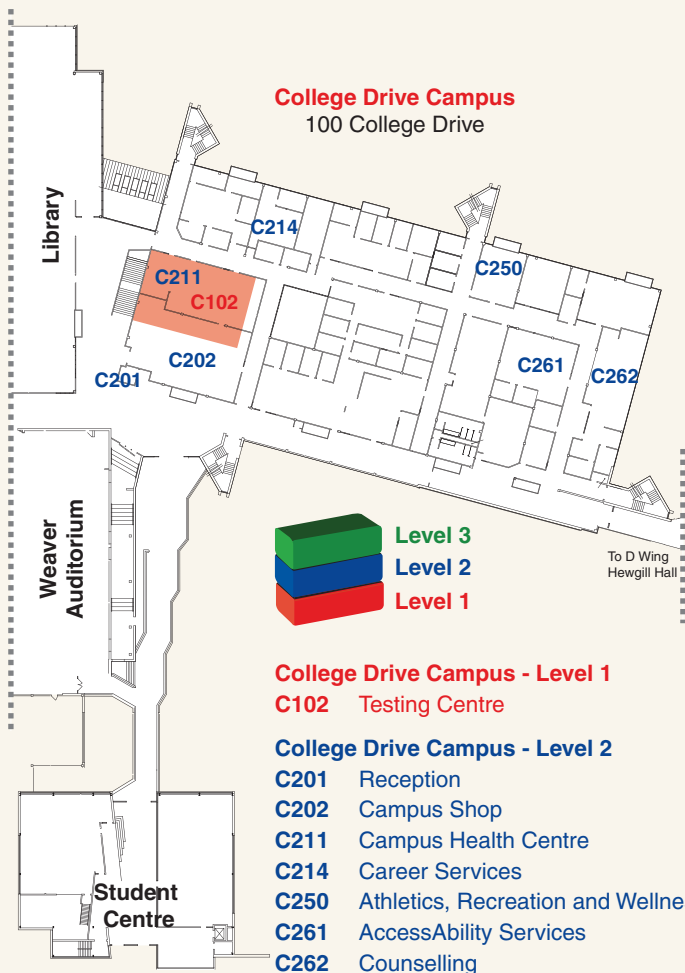

Disruptive Conduct We define disruptive conduct as any behaviour that has an adverse effect on (a) the rights of students to benefit from instruction or services provided by the College, (b) the rights and functions of employees of the College, or (c) the rights and functions of third parties who are engaged in helping the College achieve its educational objectives.

What does all this mean? It means that we have great expectations of you! We are committed to providing a superior living and learning environment for all members of the college community. An informal guideline to follow is to ask yourself if the behaviour is appropriate to a professional workplace environment.
